

# GLOBAL IMPACT

INTERNATIONAL SERVICE LEARNING IN THE DEVELOPING WORLD

## SUMMER 2018

### *Magical Morocco | Peru Quest | Discover Laos*

Global Impact is the Seattle Colleges students, faculty and staff, partnering with Healthcare professionals, educators and community members, to deliver healthcare and other volunteer service in developing countries. Global Impact volunteers make a real difference in the lives of people in developing countries. In return, the lives of volunteers are enriched by the simple act of serving others- and learning to see the world from a different perspective.

*This experience is life changing.*

## PERU QUEST

### Healthcare and Environmental Projects

Summer 2018: August 19 - September 2

The Sacred Valley of the Incas lies between Cuzco, Peru and world renowned Machu Picchu. Our Global Impact Peru projects will include delivering healthcare education and services in school and village clinics. In addition, we will participate in a strategic environmental and healthcare project installing small, clean burning stoves in villagers homes to prevent deforestation and health maladies - as well as planting trees in the Sacred Valley.

## DISCOVER LAOS

### Healthcare, Education and Infrastructure

Summer 2018: August 20 - August 31

Our newest project begins in the ancient, UNESCO World Heritage city of Luang Prabang! We will travel to villages in the remote, mountainous countryside where access to healthcare is limited. Our team will deliver healthcare services through village clinics and engage in infrastructure projects designed to positively impact public health.

## MAGICAL MOROCCO

### Healthcare, Education and Public Health Infrastructure Projects

Summer 2018: August 19 - September 2

Join Global Impact in its new program to Morocco! We will start in the city of Agadir and travel into the countryside to work in the rural village region of Riad Imsouane. During our two weeks, we will volunteer in health clinics, engage in health education and support different health projects including sustainable farming and testing water for potability.
